

Assembly instructions

RO040 Mini RollUp A3

The contents of the package:
Mini RollUp system/box: 1 piece
Two-section pole: 1 piece.

1. Place the Mini RollUp on an even surface. Connect together the two sections of the pole (a and b) to form one long pole, as shown in the picture.
2. Insert vertically the pole into the slot located on the back side of the box all the way to the base, as shown in the picture. Inserted correctly, the pole will self-sustain and thus the Mini RollUp will not swing. Please make sure that the pole is inserted to the end.

3. Gently pull out the graphic from the box with one hand holding the metal wand and the other hand on the Mini RollUp's box
4-5. Pulling the graphic straight by the metal wand, place the plastic end of the pole (b) into the notch in the middle of the Mini RollUp's metal wand, as shown in the picture.

Now your Mini RollUp A3 is ready for display.

To move the Mini RollUp is recommended to hold it from the two-section pole from the back.

The pictures are for presentation only; your product can be slightly different!
