

# Assembly instructions

## RO041 Mini RollUp A4

**The contents of the package:**  
Mini RollUp system/box: 1 piece  
Two-section pole: 1 piece.

1. Place the Mini RollUp on an even surface. Insert vertically the lower section of the pole (a) into the slot located on the back side of the box all the way to the base as shown in the picture. Inserted correctly, the pole will self-sustain and thus the Mini Rollup will not swing. Please make sure that the pole is inserted to the end.

2. By sliding, place the upper section of the pole (b) on the metal wand of the Mini RollUp up to the middle of it, as shown in the picture.

3. Gently pull out the graphic from the box with one hand holding the metal wand and the other hand on the Mini Rollup's box.

4-5. Connect together the two sections of the pole (a and b) to fix the graphic in unfolded position, as shown in the picture.

Now your Mini RollUp A4 is ready for display.

To move the Mini RollUp is recommended to hold it from the two-section pole from the back.

The pictures are for presentation only; your product can be slightly different!
